WORKING PAPER
ICS 7204-88
22 November 1988

NOTE FOR: DDR&E Task Force

FROM: DDR&E/ICS

SUBJECT: Background Data

1. This note is FYI. (U)

2. I received today a set of data from [redacted] CRES/CIA. A copy is attached. The material is essentially self-explanatory. (U)

STAT

3. This is all fascinating material and worth a bit of our attention. Even so, I don't find this material very nourishing. The key reason is that the apparent "unit of account"--i.e., share of NFIP investment--is tantalizing but mostly useless all by itself. As you might expect, I believe any such treatment should be derived from what US intelligence needs to do--as derived from the President's policies and commitments. (C)

4. I hope this is useful to you. (U)
